March 29 · 🌐

Starting today, March 29, all adults in Texas are now eligible to get their COVID-19 vaccine. We hope to have vaccine appointments available to the general public soon.

People age 80 and older are invited to come to our Wonderland of the Americas Upper and Lower Level Vaccination Centers at their convenience any day, Monday – Friday from 8 a.m. to 5 p.m.

To help make the process as easy as possible for this priority population, this no-appointment option is only available to those who are at least 80 years old. Photo identification with a date of birth will be required at the vaccination center. [See less](#)

Visit the COVID-19 Information Center for vaccine resources.
